

Domino's Pizza Sales Dashboard – Summary (Nigeria Branch)

1. Descriptive Analysis (What Happened) :

Performance Overview: The company generated **₦47M** in revenue, slightly below the set **goal of ₦48M**.

Total Units Sold: The 5 branches collectively sold (15 K) pizzas.

Branch Sales Overview: Branch sales remained fairly even, with Ikoyi and Gbagada recording the highest revenue of **₦ 9.8 M** each.

Top 5 Performing Pizzas: “Hot Pepperoni Feast” (**quantity 1073** and **revenue 4.3 M**), “Chicken Suya “ (**quantity 956** and **revenue 3.8 M**), “BBQ Philly Steak “ (**quantity 952** and **revenue 3.8 M**), “Hot Veggie” (**quantity 950** and **revenue 3.8 M**), “Pepperoni Feast” (**quantity 907** and **revenue 3.6 M**).

Lowest Performance Pizzas: “Meatzaa” (**quantity 838** and **revenue 1.7 M**), “Chicken Feast” (**quantity 872** and **revenue 1.7 M**), “Chicken Legend” (**quantity 883** and **revenue 1.8 M**), “Chicken Bali” (**quantity 889** and **revenue 1.8 M**), “Extravaganza” (**quantity 907** and **revenue 1.8 M**).

Daily Sales Trends:

Pizza sales revenue fluctuated on a daily basis. The highest revenues were recorded on **December 6th (3.87M)**, **12th (3.86M)**, **5th (3.81M)**, and **11th (3.67M)**.

On the other hand, the lowest revenues were observed on **December 15th (3.35M)**, **9th (3.46M)**, **10th (3.50M)**, and **4th (3.59M)**.

2.Diagnostic Analysis (Why It Happened):

Performance Driver: The strong sales of popular pizzas like "**Hot Pepperoni Feast**" and "**Chicken Suya**" were the key success drivers that brought the total revenue close to the target.

Pizza Goal vs Performance (Target vs. Actual Sales):

Out of a total of **16 pizzas**, we achieved the sales targets for only **13 pizzas**. The remaining **3 pizzas failed** to meet their targets.

Daily Sales Performance (Sales Target vs Actual):

On **December 3, 5, 7, 8, 9, 10, and 15**, we **could not achieve** our sales targets. On the other hand, on **December 4, 6, 11, 12, 13, and 14**, we **successfully achieved** our sales targets.

Low-Performing Products: Specific products such as "**Italiano (3.0 million)**", "**BBQ Chicken (3.6 million)**" and "**Margherita (1.7 million)**" failed to achieve their individual sales targets. Therefore, the overall target level was not achieved.

Daily Sales Up & Down: Daily Overview:

Based on sales data from **December 3rd to 15th**, total sales amounted to **47,370,000**. The sales performance exhibited significant daily volatility, peaking at **224,000 on December 6th**. During this period, notable declines were also observed, including the largest single-day drops of **271,000 on December 13th**.

3.Predictive Analysis (What Could Happen Next):

Persistent Popularity:

"**Hot Pepperoni Feast**" and "**Chicken Suya**" are **likely** to continue as the main revenue drivers.

Possible Risk:

The downward daily pizza sales trend observed on **December 9 and 15** may continue if no corrective actions are taken.

Long-term underperformance:

Initiate revised strategies and campaigns to improve performance for pizzas that have consistently failed to meet their sales targets.

4.Business Recommendations:**Feature Top-Selling Items:**

Create special offers or combo deals featuring the top-selling pizzas, such as "**Hot Pepperoni Feast**" and "**Chicken Suya**," to maximize revenue.

Investigate Sales Laggards:

Investigate why pizzas such as "**BBQ Chicken**," "**Italiano**," and "**Margarita**" are underperforming. Consider factors like customer feedback, pricing adjustments, or targeted promotions to improve their sales.

Maintain Daily Sales Stability:

Implement day-specific promotions to smooth out fluctuating sales and prevent declines on slow days.

Implement Best Practices:

Analyze what top-performing branches, such as **Ikoyi** and **Gbagada**, are doing differently and implement these successful strategies at other locations.
